

41. An image information transmission unit provided with:
pen input means able to enter character or drawing information by
operating a pen;

conversion means for converting the character information entered by
said pen input means into a specified code;

designation means for designating that the information entered by said
pen input means is a facsimile number; and

transmission means for transmitting the character or drawing
information entered by said pen input means or the code converted by said
conversion means, based on the facsimile number of an addressee designated
by said designation means.

42. The portable communicator according to claim 35 in which said
portable computer is provided with mark change display control means for
displaying the mark indicating execution replacing said identification
marker when the code transmitted from said image retrieval means is the
code indicating execution of the selected item.

REMARKS

Please enter the above amendments before consideration of this
application.

Respectfully submitted,

Toshiharu Enmei
